WORKING DATA FOR DEMAND ANALYSIS

U.S. Department of Agriculture
Economics, Statistics and Cooperatives Service
National Economics Division
Washington, D.C.

WORKING DATA FOR DEMAND ANALYSIS

The attached tables contain a number of time series frequently used in statistical demand analysis. These tables are revised annually by Ann Duncan of the National Outlook Analysis Project, 447-2317. The material as a whole is not for general publication and the exact status of each series can be ascertained from the footnotes. Since some of these data are regularly compiled by other agencies, it is suggested that current revisions of basic data, particularly the estimates of total income and expenditures of the Department of Commerce and the estimates of prices by the Bureau of Labor Statistics can best be obtained directly in publications from those agencies.

Table 1.-- Population, United States

Year	1/		Total civilian		Farm population
	Total population July 1		population July 1		April 1 2/
	50 States	48 States	50 States	48 States

FOOTNOTES

1/ Bureau of the Census Series P-25, No. 877.

2/ Farm population of the United States as of April 1; estimated jointly by ERS and the Bureau of the Census. Beginning 1941, series revised for new definition of farm population; beginning 1960, includes 50 States; beginning 1978 new definition includes only places with sales of \$1,000 or more per year.

3/ Includes 50 States, beginning 1960. Revised data released by Department of Commerce in National Income and Product Accounts of U.S., 1929-74. Current data in Survey of Current Business published monthly.
